Instructions

1. First, ensure that WinRAR is installed on your computer.
2. Make sure that you are logged into Google and that third-party cookies are enabled.
3. Right-click on each folder you want to download and select the "Download" option.
4. After downloading, use WinRAR to unzip the folders.

These steps are applicable only to desktops or laptops, as mobile phones may not support them. Most folders are compressed in ".zip" or ".rar" format. If you encounter errors like download failures due to file size limitations, try copying the link and pasting it into a different browser, such as Microsoft Edge.
