INTRODUCTION

Welcome to my e-book on ChatGPT use cases! This revolutionary technology can open a world of possibilities but many of them remain hidden. My hope is that with the knowledge contained in this e-book, you will have the tools to unlock your full potential and make the most of your life.

Overall, the e-book is designed to help you achieve your goals by providing you with prompts (the lines you type into ChatGPT) and formulas to enhance your natural abilities. I organized them into 5 categories:

• Productivity – Save time and increase your output

• Writing – Write almost anything

• Social – Improve your communication

• Health - Custom meal and workout plans

• Entertainment- Just for fun

I hope you find the information in this e-book useful.

Let's dive right in.

GUIDELINES

From the second I decided to write this e-book it was clear to me that including the following guidelines would be essential to get the most out of the following prompts, so read them carefully as one can easily get lost in the conversational flow ChatGPT provides.

Consider Privacy

Chatbots often collect and store personal data, so it's important to ensure that you only feed it data that you would also share in a typical social media post.

Be Transparent

When you use the outputs in your everyday life it's important to be upfront about the fact that you are using a chatbot. This helps with managing future expectations and allows yourself to maintain your self-respect. For example, I used ChatGPT extensively in the creation of this e-book, but besides the legal text and some of the examples, none of it was copy-pasted. See how this works? There is no shame in using freely available technology to your advantage. Just don't deceive others as this will always catch up with you in unpredictable ways.

TEACHING FLUX

Plagiarism

AI detection software is being worked and improved on every day. So don't expect any of the blindly copy-pasted chatbot outputs to stand the test of time. Especially when it comes to critical pieces of work that you intend to build your life upon (such as a university thesis or a book). As of 2025 the best use-case for this technology is to kickstart your project or idea, so don't just blindly copy-paste without disclosing the use of AI tools. Take what it gives you and expand it with your own thoughts and ideas.

The Bias Is Real

Chatbots can often reflect the biases of their creators or the data they are trained on. It's essential to be aware of these biases and to use chatbots to improve and uplift your and others actions.

Personal Responsibility

It should go without saying that chatbots are not a replacement for human interaction and should not be used to exploit or manipulate others. AI can give you some amazing abilities and powers, but it's up to you to use them responsibly.

HOW TO USE

Explainer

The focus of this book is presenting you with prompts and every page that features a new prompt consists of 3 basic sections:

- Prompt – My favorite use-case that ask for a response from Chat GPT. Simply copy-paste this into the text field and hit enter

- Formula – Customize the prompts to your own needs. Replace the word in square brackets with your very own.

- Example – Get inspired by some practical use-cases that are also copy-paste ready.

Follow-Up

In many cases the first prompt you send is just a starting point on your journey to a useful answer. Here are my favorite 1-line prompts (with replaceable words in square brackets) that you can send as a follow-up to your initial input:

- "10 more"
- "Write that in a [conversational] tone"
- "Dumb it down"
- "Use advanced language"
- "Try again"

Better Answers

ChatGPT is excellent at assuming context, but every time you give it more details the response is going to reflect that. Here is a quick example that clearly demonstrates this:

Prompt 1: Come up with a name for my band. ChatGPT: The

Electric Dreams, Midnight Masquerade, The
Velvet Vultures, The Neon Knights
Prompt 2: Come up with a name for my punk rock band from Eastern Europe.
ChatGPT: The Iron Curtain, Revolution Radio, The Red Flags

And now I would like to share some concrete tips on how-to improve the accuracy of the outputs you receive:

- More detail = more detailed answer
- Add details by following this general formula: [prompt], specifically [details]
- Communicate your desired outcomes clearly
- Establish context (relationships, company culture, reader of the output, …)
- Provide ChatGPT with your own writing before you ask it a question. (Learn exactly how on the next page)

Teach ChatGPT Your Style

One of the most powerful, yet hidden, capabilities of ChatGPT is its ability to learn about your writing style and then respond in it. This trick is quite simple once you understand how it works:

Let's say you want ChatGPT to write your et so before telling

it to "Write me an email about [topic]" send the following line:

"Analyze the following text for style and tone of voice. Apply that exact style and tone of voice to all your future responses: [insert your writing]" This works best if you send the exact

type of writing you
want it to mimic (If you are writing an email give it an actual email you wrote).

Let's Begin

It's time to transition towards the section of the book that focuses on the actual prompts.

My recommendation would be opening this e-book
on one half of the screen and ChatGPT on the other.
And if you are not sure where to start, the Entertainment chapter is always an easy entry point.

TEACHING FLUX

Productivity

GENERATE IDEAS

Prompt

Can you give me ideas for blog posts about real estate, perhaps covering topics such as buying, selling, investing, or managing property?

Formula

Can you give me ideas for [format] about [subject], perhaps covering [topics]?

Examples

- Can you give me ideas for a series of blog posts about sustainability, perhaps covering topics like eco-friendly fashion, zero waste living, and renewable energy?
