

DC ARCHITECTS
Shaping the
Future of Design
in Tripura

Creating Innovative and
Sustainable Architectural Solutions

Welcome

- To DC Architects, a leading architecture and design firm based in Agartala, Tripura. With a commitment to excellence and a focus on sustainability, we bring innovative, modern designs to life, tailored to the unique needs of our clients.
- Our mission is to transform ideas into reality through creative, functional, and sustainable architecture.

Our Design Philosophy

Sustainability: At DC Architects, we believe in designing buildings that are environmentally responsible and resource-efficient throughout their lifecycle.

Innovation: Combining cutting-edge technology with creative thinking, we push the boundaries of modern architecture.

Client-Centered Approach: We work closely with our clients to understand their vision and translate it into a design that exceeds expectations.

Functional Aesthetics: We ensure that every space we design is not only visually stunning but also highly functional and user-friendly.

Quote:

“Our goal is to create spaces that inspire and improve the quality of life for the people who use them.” –
Mr. Deba Datta Debbarma, Founder
& Principal Architect

Services We Offer

Residential Architecture: From luxury homes to modern apartments, we design spaces that reflect the lifestyle and personality of their inhabitants.

Commercial Architecture: Our commercial projects range from office buildings and retail spaces to hospitality design, all aimed at enhancing business operations and guest experiences.

Interior Design: We create thoughtful, functional interiors that align with the overall architectural design while adding a unique touch of style.

Urban Planning: We design public spaces and city plans that enhance the urban experience, focusing on smart and sustainable growth.

Renovation & Restoration: We breathe new life into old structures, blending contemporary elements with historical integrity.

Quote: “Our goal is to create spaces that inspire and improve the quality of life for the people who use them.”
Mr. Deba Datta Debbarma,
Founder & Principal Architect

Featured Projects

1. Luxury Residence in Agartala

A high-end residential project that combines contemporary aesthetics with traditional Tripuri architectural elements. The house is energy-efficient, featuring solar panels and natural ventilation.

Key Features: Open-plan living spaces, green roofs, and a stunning pool area.

✓ 2. Skyline Mall

A commercial space designed to be a shopping hub in the heart of Agartala. The mall's sleek design is aimed at maximizing footfall and enhancing the shopping experience.

Key Features: Glass facade, natural light optimization, and spacious interiors.

✓ 3. Eco-Friendly Office Complex

An office building for a corporate client, designed with sustainability in mind. The project features energy-efficient lighting, water recycling systems, and a rooftop garden.

Key Features: Modular office spaces, eco-friendly materials, and biophilic design

Founder & Principal Architect*

Our Process

Step 1: Consultation

We begin with a thorough consultation to understand the client's vision, needs, and budget.

Step 2: Concept Design

Our architects and designers create concept sketches and digital models to visualize the project.

Step 3: Design Development

We fine-tune the design, focusing on materials, sustainability, and construction feasibility.

Step 4: Project Execution

Our project management team ensures smooth execution from construction to completion, ensuring the highest standards are met.

Step 5: Post-Completion Support

We offer ongoing support for maintenance and adjustments, ensuring client satisfaction even after the project is delivered.

Meet the Team
