INTRODUCTION

Have you heard of the secret Canva brand codes that you can use to find tons of amazing elements in Canva?

I'm revealing some of my favorite secret Canva Brand Codes in this book!

Stay until the end to collect the Canva Brand Code Cheat Sheets for simple reference.

So first of all let's understand what elements are.

Canva elements keywords are one of the most valuable best-kept secrets. There are all kinds of ways to create eye-catching graphic designs, illustrations, and templates in Canva, (no matter your brand aesthetic) by using Canva elements keywords.

This book will show Canva users a series of secret brand codes or search keywords, which allow users to search for images created by the same designer, or organized by the same theme.

What are Secret Canva Brand Codes?

Brand codes are how Canva identifies a unique creator. And these Canva secret codes are super useful in finding tons of design by the same creator.

Each creator that contributes to Canva has a code. When you search for a specific brand code you can find all the elements that a creator has contributed to Canva.

Brand codes can be especially helpful to create a cohesive look in your designs and stay on brand.

Why is this useful?

These secret Canva brand codes and search keywords help designers create more cohesive and professional-looking designs.

To find a brand code from the elements tab:

- Search for a design in the Elements search bar
- Click on the three little dots in the upper right-hand corner of an element
- Click on View More by "Brand"
- The brand code will now appear in the Elements search bar
